Testimony RE: SB1012

The agency for the blind has helped me to live independently by paying the Carroll Center to train me in those independent living skills. If not for the agency, I wouldn't be able to live home. The agency also marked my electrical appliances such as my stove, washer and dryer. At present, the agency is helping me to attain some other employment. For these reasons, I would like to have the agency continue for any blind people that will come after me.

Thank you.
