

To all CT legislatures.

I am a [Grandmom](#) of a six year old visually impaired grandson in the Stamford Public Schools. He is in Kindergarten and received services from [BSBE](#). I am a special education teacher in NJ and am aware of the need for Kenny to receive services for his disability. He will need mobility assistance/safety help and the need to have computer assistant technology for him to be able to be competitive with his peers throughout his school years. If you take away funding, where will he be left? Please reconsider your votes on this bill and allow him all the resources necessary for him to succeed in his education. Thank you.
