H.B. No. 5616(RAISED)

AN ACT CONCERNING LICENSURE OF ADVANCED DENTAL HYGIENE PRACTITIONERS.

To the Public Health Committee:

Testimony from Mary Moran Boudreau, RDH, MBA
Connecticut Dental Hygienists' Association Executive Director
Resident of Windsor, Connecticut

March 1, 2011

I support Bill # 5616, AN ACT CONCERNING LICENSURE OF ADVANCED DENTAL HYGIENE PRACTITIONERS.

I urge your support in the development of an Advanced Dental Hygiene Practitioner (ADHP) in Connecticut. The ADHP is a midlevel dental provider which has the goal is to increase access to oral care to those presently not being served.

As the CDHA Executive Director, member of the DPH Task Force on Oral Access for Older Adults, the Advisory Committee for DPH Dental Home By One, Connecticut Oral Health Initiative (COHI) and co-chair of the Workforce Development Subcommittee of the Connecticut Coalition on Oral Health and many other committees and organizations, I constantly hear the need for access to oral care beyond the prevention we, dental hygienists, do already for many of our Connecticut population where there are not enough dentists providing it. The ADHP would be one option to correct this situation offering treatments such as diagnosis, preventive, restorative (fillings) and therapeutic services directly to the public in facilities where the need is greater than the supply of dentists. There are already registered dental hygienists (RDH) in many of these areas. Why not take advantage of this opportunity to offer care by dental hygienists who with advanced education can fill this gap.

The ADHP will be well qualified as a graduate with a Master's degree, educated at an accredited dental hygiene school that includes completing didactic and clinical competencies to perform the highest standards of clinical care. The ADHP will perform the scope of practice of a dental hygienist and have additional procedures such as limited restorative procedures combined with referrals to dentist and other medical personnel for total health. Licensure will secure the safety for the treated population.

It is important to increase the number of providers of diagnostic, restorative and therapeutic oral care through workforce models that culminate in gradation from an accredited institution, professional licensure and can provide direct access to patient care. The Advanced Dental Hygiene Practitioner is this professional.

Please email me at maryb@cdha-rdh.com or call me at 860-688-7307 if you have any questions or need further information.

Thank you,
Mary Moran Boudreau, RDH, MBA
