

HB 632

If the proposed sex offender site goes forward, it will prove that the state of Connecticut does not care about the safety and well being of its citizens. This proposed site is within walking distance to a daycare, St Bernard's high school, Mohegan elementary school, and many businesses owned and operated by women.

I would like you to put yourselves in my position, having to explain to my daughters that their freedom to play in their yard or take a walk will come to an end.

Having to panic if we are five minutes late for my middle school daughter's bus, not knowing who is waiting or watching her enter the house. If this site goes forward it would rob my children of the freedoms that comes with growing up. I would invite the commissioner to come and explain to my daughters how the rights of deviant sex offenders outweigh their right to grow up safe and unafraid.

I urge you all to take a long second look at this site, and you will see it is all wrong.
