For today's public hearing:

Raised Bill 1094
Ban of Large Capacity Magazines

TO WHOM IT MAY CONCERN

Here we go again, yet another proposed law that can make law abiding gun owners criminals. Take my personal possessions and erode my second amendment right even more. Not only would this hurt me but all the people involved in their manufacture from raw material to the retailer that sells them. Can one imagine the expense of enacting and enforcing such an insane law?

As free people we should be able to exercise our right, not be allowed to. Instead we get a red tape paper chase, our so called right is not really a right but a government permit with all its paper work of applications, approvals, taxes called fees, required classes, tests, licenses, fingerprinting, photographs, and criminal data base listings all with expirations dates on my rights. Good god man, give us a break.

We don't need new laws; we need better enforcement of existing laws, unshackle our police and allow them to do their job without fear of being stepped on by "big brother". This proposal hurts everyone but the criminal, does anyone honestly think that the criminal cares whether or not another new law is enacted?

Please, I urge you to oppose this proposal, it really does nothing to deter crime and only hurts business and law abiding citizens.
