

Dear Sir or Madam,

I'm writing you today about Raised Bill SB 1094, "An Act Concerning Large Capacity Ammunition Magazines". I quite aware of the undercurrents of heightened sensitivity to public safety by many citizens, as well as the general misconceptions about guns in general, however I am humbly asking that you not support this bill. It seems to me that this bill, like with many ill-conceived pieces of legislation, was born of emotional reaction to stories in the news or other such occurrences. I feel that our government should not be minimizing the rights of law abiding citizens to protect themselves, their families and their property. I responsibly own and maintain firearms, and hope the day never comes when I must use any such force to protect myself or my family. However our State has some of the strictest gun laws on the books, and I am perfectly fine with some of them, but further restricting the rights of responsible people who obey the law is, in my opinion, not the right way to go about ensuring the security of the citizenry. Thank you for your ongoing efforts to at the Capitol, and I hope that you will see the folly inherent in this bill.

Thank you for your time and attention,

Greg Pack
