To Whom It May Concern:

I am writing this letter in response to the upcoming Bill (1094) which would ban Magazines with Factory set limits above 10 rounds. It was not made clear as to how this would help solve the potential problems found in the proper use of said items. In enforcing this Bill I understand that the magazines will be taken away from the law bidding citizen. I find this quite unfair and unreasonable as they were purchased legally and with the understanding that the magazines were designed for the Pistol / Rifle in mind.

- Is there data that would support the unlawful use of a gun from that of a law bidding gun owner vs an illegal position?
- How have you come up with the 10 round capacity?

In confiscating a person's belongings especially when purchased in a legal manor I find as being non constitutional. Please explain your thought process behind this as you are not providing compensation or reasons you need to enforce this type of Bill.

Best regards

Leslie O. Spector
