

SB 1094

I am a firearms enthusiast; I received my first rifle from my father @ age eight. I still have it. I own everything from Flint Locks to Resister Assault Weapons (sic) and Machine guns.

Most of my Registered Assault Weapons NEVER did not have, nor EVER will have 10 round magazines. Of my Federally Licensed Machine guns (NFA Firearms); one uses 20 round magazines and the other uses 250 round belts.

This law will make most of my Firearms unable to be fired. This is what they really want anyway. A side effect I bet you people did not even think of. Now I know this would make the Democrats VERY Happy.

Is there going to be any exemption for Registered Assault Weapon (sic) and Federally Licensed Machine Guns??

Some of these magazines are expensive. I have in the neighborhood of \$500.00 tied up. Who is going to compensate me for my loss??

I know that you just want to enact some common sense gun control laws, but where will it end? Great Britain has banned all hand guns. The crime rate has sky rocketed and England is awash in illegal handguns from Russia. Many of the "bobbies" have to carry side arms now.

Now Great Britain wants to ban all "pointed kitchen knives."

As part of the nationwide "Safe, Sensible, Social" Campaign, the British Home Office wants to have a "safer" pint glass for all the pubs. They want to make them out of shatterproof plastic so the patrons cannot use them as weapons!!

Now ask yourself, where does the "idiocy" end?

It should end right here with SB 1094 being thrown in the thrash.

We all know that SB 1094 will not have any effect on crime. It is not intended to reduce crime. It is being done to take away our rights. It is obvious that we cannot be trusted to made the correct decision on own. We must be "nudged" in the right direction. I should take up Golf instead.

After all, "We all have some Homer Simon in us" and we need an Enlightened Despot to show us the way. Fortunately, here in Connecticut we have many Enlightened Despots.
