Subject: Testimony in Support of HB5530

Dear Ms. Giannaros,

I am writing regarding the hearing to discuss several new bills, including the recently introduced student dissection choice legislation.

It is a very exciting time in the history of humanity when we there are people willing to work to give students a choice in choosing dissection. This is progress. The highest purpose of education should be to teach children to think for themselves and make decisions that they feel morally and ethically comfortable with.

I never understood how to find out what gives live we take it.

I do hope that we do the right thing and give students a choose if they do not feel it is not right to kill so many innocent animals for learning.

Sincerely,

Sally Anne Hubbard
