Subject: Testimony in Support of HB5530

Dear Ms Giannaros,

I strongly support not forcing students to dissect animals. I still remember being forced to dissect a frog when I was in school. Since I was and still am ethically opposed to dissection, it was a hideous experience and even 40 years later I am still upset by it.

It is just plain wrong to force kids to do something which they believe to be unethical.

Thank you for considering my opinion.

Sincerely,

Wendy Horowitz
