To Whom It May Concern:

This letter is to plead with you to reject HB-5460 because of how harmful it would be to employers in CT.

Passing of this bill would completely inhibit our ability as an employer to speak freely to our employees and share important news about what is happening around the area in which they live. We have prided ourselves on being able to have solid positive communications with our employees so by doing this would cause disruptions and begin to breakdown the positive relationships that we have built.

I hope that you really reconsider and take into account what type of situation you will be putting company's in CT in.

Thank you.

Christine Goodall
HR Generalist
