

Dear Sirs,

Enough is Enough. Instead of spending your time chasing away business from Connecticut because your actions, please consider creating pro business legislation.

If it is your intent to foster the cost of doing business by placing burdensome restrictions on business & the threat of added legal cost, then pass this law.

If it is your belief that the "State" needs to be omnipresent & that a dictatorship of the proletariat should exist, then pass this legislation.

However, if you believe in individual freedom & in the principles of our constitution, then you will be more thoughtful in your legislative efforts.

Please stop the process on this useless piece of legislation.

Thank you
