I personally feel that this bill is taking away one of our most cherished amendments. The Freedom of Speech. Why does our legislature want to gag all of us. I have had a very small business for 20 years in Connecticut. My employees have often discussed many of the very topics that are outlined in the Bill. This is absolutely the worst conceived bill I have ever heard of. It seems that we have several Progressive legislative members in Connecticut as well as in Washington.

You are not only gagging owners but also the employees of businesses. Please rethink the bill and as a matter of recognizing the Amendment, be rid of it!
