

Dear Legislators

I want to express my support for Liability Law reforms found in the following Bills: SB 43, SB 90, and HB5254. It is so import that we keep America accessible to her people. We cannot continue to allow individuals to obtain huge settlements in court. Municipalities need protection from user's law suites or they will be forced to restrict access and so many people will lose their local area where they relax and exercise. We need more places to walk, run and ride or bikes. These bills will allow excising places like the MDC to stay open and hopefully encourage other place to be opened.

Thank you for your time and consideration.
