

My Dearest Committee members,

The days ahead are filled with testimony, support for the bills S.B.43, S.B. 90, and H.B.5254. These economy spurring bills should be passed. Restoring recreational liability, protection to municipalities will be an economic boost ? Yes. People will need:

- 1) Gasoline to arrive at these areas
- 2) Equipment and clothing (whether forgotten at home or new for this excursion)
- 3) Food Resources (fresh air stimulates the appetite)

Dining establishments, retail stores will see an increase in income. They might even have to hire new employees. Please think of the passage of these bills as having a trifold purpose-effect. Economy boosters, job creators and liability, protection for the municipalities.

Sincerely,
M. Hope Fish
