SB 1052- An Act Concerning the Practice of Acupuncture
Public Health Committee Public Hearing March 2, 2011

Dear Senator Gerratana, Representative Ritter and Members of the Public Health Committee:

I want to thank the Committee for raising SB 1052 (AAC The Practice of Acupuncture), and encourage your Committee to approve the bill.

I am writing as an acupuncture patient in the state of Connecticut, where I have lived and worked for most of my life, raised my family and hope to retire here.

I was hospitalized last year for an undiagnosable problem where not much could be done and was told that I would be deaf and dizzy for probably the rest of my life. At that point, I sought alternative help.

My acupuncturist looked into underlying causes in my energy flow through acupuncture and dietary changes. I found relief within a few weeks and have found steady improvement. I honestly believe it is so very important for the public to know about the benefit of this medicine, and thank you for raising this important bill. It makes a huge difference for patients like me where everybody else gave me no answers and no hope.

So thank you again for your consideration.

Sincerely,

Bozena Anne Fraczek
