

Hello.

I am writing to formally render my viewpoint on the proposed changes to SB 1105. As the parent of a child with autism I beseech you to reconsider the notion that highly specialized training is not necessitated for PROPER Applied Behavior Analysis therapy. Our children deserve skilled practitioners and research-based methodologies.

Once again, please consider my concern and opposition as we reconsider that appropriateness of educational services means taking the needs of ALL of our students into account.

I thank you for your time.

Gratefully,

Allison Papageorge
