

Dear members of the Planning and Development Committee,

I urge your support for SB43, SB90 and HB5254, legislation to limit municipal liability for park and recreational areas. We need to keep park and recreational areas open to the public. Open spaces are necessary for children, adults and everyone. They should not be closed due to fears of liability.

It is also important that more of the public enjoy these open spaces, so we have more public support for protection of this planet. If these spaces are closed off, we are all cut off from nature.

Please pass this legislation out of committee with a strong recommendation.
