

Dear Allison;

I am a father of two active boys who enjoy mountain biking, boating, and hiking. I am 49 years and have been participating in extreme sports and organized violent sports (hockey, Lacrosse) for most of my life, and love it. The one thing that was instilled in me as a youngster was personal accountability. People are now taught to blame everybody else for their mistakes, a lot of this is due to the AMBULANCE CHASING LAWYERS' Relentless Add Campaign brain washing people to blame everybody for their own stupidity and the possibility of quick cash.

The CT Legislature needs to pass needed Liability Law Reforms found in the following Bills: SB 43, SB 90 and HB524.

There is limited space for all to enjoy, if these areas are shut down because some Nuckle Head falls down we will soon be limited to "Wii the outdoor game".

There is risk of injury in everything we do. You can sprain your ankle hiking or running. I know more road riders who have been hurt due to being nicked by cars, road side sand bars and run over, and are at even more risk now due to drivers talking on Cell Phones and Texting.

Please enact the Liability Reforms so we all can continue to enjoy the Natural Beauty Connecticut offers

Thank you for your time.

Regards,
Kevin Knowles
