

I would like to express my strong support for the above legislation.

I believe that we need to protect municipalities from outrageous lawsuits like the one won by a woman who was injured in Metropolitan District property in West Hartford.

Places like the West Hartford Reservoir provide access to recreation, leisure, exercise and outdoors experiences for many many residents of the Connecticut.

I specifically enjoy cycling and mountain biking in many publicly accessible properties such as the West Hartford Reservoir, and it would be a tremendous loss to me and to the quality of life of many other state residents if access for cycling and other outdoor activities were curtailed in any way in these places.

Sincerely,  
Scott M. Pape
