

To Whom it may concern,

I am writing to ask that these Bill go forward to give municipalities and non-profit municipal corporations liability protection so that ALL of our public access activities in various towns will not be lost. The recent discussions in some towns and cities about shutting down things like sledding and even rail trails is very disheartening after all the hard work MANY groups have put in to give us healthy rec areas. I am semi retired and both road(rail trail) and mountain bike. I could not afford to go private camps or areas just to ride.

Please Put us back on the right track,

HOPEFULLY, Walter Buckheit - Cheshire CT
