

Dear Public Health Committee Members:

In regard to:

House Bill 5610 -- An Act Concerning The Duties of a Pharmacist When Filling a Prescription Used for the Treatment of Epilepsy or the Prevention of Seizures

As it stands, the policy for filling prescriptions from randomly chosen pharmaceutical companies, at the will and whim of the pharmacist and pharmacy, is **quite dangerous**. Would you or someone you know want to endure a seizure and all that may ensue from having that seizure, just because a pharmacist does not have to make that phone call? Please, please pass this bill requiring pharmacists to inform patients and their physicians when they want to change the prescribed medications.

Most sincerely,

Carol Anderson
