March 2, 2012

Dear Senator Prague,

While working with Councilor Billy Caron on the need for a Bill to help provide a Senior Safety Zone for our Seniors, I had a discussion with my group of Senior Center Directors from Southeastern Connecticut and found a strong response of support from the other Directors as well. Our Directors from SECT are very happy to write letters of support of this Bill as many have already had serious incidents within their own Centers and we all feel very strong about the need to keep this from happening as best we can. We believe a Bill is the first place to start as well. Many of the members of our group belong to other organizations that support the senior citizens population in our State and will welcome the opportunity to show support via those organizations when the Bill is proposed. I will continue to work closely with Councilor Caron and support your efforts with this Bill. I thank you for all of your efforts with this issue and bringing this to the State level for the protection of our seniors. I am in appreciation of Councilman Caron for his support on the State and local level and for working with you to move this Bill forward. I would like to help with this matter and offer my assistance in any way possible. Thank you again and for all of your efforts for our senior citizen population, they are greatly appreciated.

Sincerely,

Kathleen Doherty-Peck, Director
Montville Senior & Social Services
