

New London has been anticipating this Shore Line East service for several years and appreciates Gov. Malloy's plans for service beginning in 2013. Our current limited week-day service has been expanding ridership each quarter despite the very limited time-table available to riders. We hope for an expanded schedule of trains between New London and New Haven on a 7-day schedule for 2013. The grass-roots effort of the Shore Line East, One More Stop committee is very effective in encouraging ridership. The many weekend events in New London, as well as the many people who work in New York and have homes in this area are very interested in having more frequent rail service.

Thank you.
