Appropriations Committee

Public Hearing, February 21, 2012

Testimony Submitted by: Kathleen M. Queen, Executive Director, Wallingford Community Day Care Center, Inc. and Co-Chair, State Funded Directors Forum

Governor's Education Budget, HB No. 5014 An Act Making Adjustments to State Expenditures and Revenues for the Fiscal Year Ending June 30, 2013

Senator Harp, Representative Walker and Members of the Committee:

My name is Kathy Queen, Co-chair of the State Funded Child Care Center Director's Forum representing the 102 early care and education child care centers in CT, and Director of Wallingford Community Day Care Center, Inc.

I am here to testify in **support of the proposed Education budget related to child care services**, and appreciate the continued funding for the network of 102 quality child care centers in 53 municipalities in Connecticut, serving over 4300 children, including 1200 infants and toddlers. Since 1968, Connecticut has made a sustained investment in quality child care for low and moderate income **working parent** families (CT Statute 8-210b). Our Centers form an important component of the early care and education system. We believe wholeheartedly in high standards for staff and programs and are currently mandated to acquire and maintain NAEYC accreditation and our staff must meet standards set by the School Readiness Law.

The Town of Wallingford has been the grantee and partner for our state funded child care program since 1969. Without this partnership the Center may not have been able to help thousands of parents stay employed while providing a quality education for their children. Our families are the backbone of our community and are proud contributing members of society because they can access safe, secure, high quality education and care for their youngest children.

As part of the 2012-2013 biennial budget, the state funded child care centers were moved from the oversight of the Department of Social Services to the State Department of Education, charged with developing a coordinated system of early care and education, integrating child care centers with the School Readiness Program. We have worked diligently with SDE over the past several months and continue to work on a set of recommendations that will establish a seamless program serving children from birth to age eight targeted for 2014.

The early care and education system requires support and funding for professional development to ensure teachers obtain mandated credentials. To that end, we support the increase in **quality enhancement dollars for professional development and career advancement**.

**Additionally, we ask that a priority for the allocation of professional development funds go to programs mandated to achieve NAEYC accreditation and increased staffing qualifications.** These standards are the foundation of Connecticut's proposed TQRIS system envisioned in the Governor's Education legislation, SB 24,

Section 35, and quality enhancement dollars are necessary for teachers serving infants, toddlers, and three and four year olds to comply with program and staffing mandates.

In summary, the Centers appreciate Governor Malloy's investment in early care and education and we urge the Appropriations Committee to support these budget recommendations. Thank you for your consideration of these important issues.

Respectfully Submitted:

Kathleen M. Queen, Executive Director
