

Hello,

My name is Janna Berger and I am the field manager at Adamah farm and fellowship in Falls Village CT. It is so important to require the labeling of genetically-engineered foods and to create best practices for GMO farming and preferences for food products that are voluntarily labeled to indicate whether they include genetically-engineered ingredients. We all deserve to make an informed choice about the foods we eat and it is the responsibility of government to help us do that. 93% of Americans want the FDA to label genetically engineered foods. I feel very strongly that, while GMO technology should continue to be researched, consumers should be prioritized rather than the producers of the technology. I strongly support bill 5117.

Thanks,
Janna Berger
Falls Village, CT
