

I am emailing you in regards to the Bill to require labeling of GMOs H.B. No. 5117 as a concerned citizen, consumer and Tax payer.

I would urge the support of mandatory labeling of any GMO product. I believe the public has the Right to know what exactly they are buying and using. With increased rates of Cancers, allergies in children and various health problems in our world, we should have the right to make informed decisions and choices when purchasing. It would be irresponsible and deceptive to not inform the public what they are indeed purchasing.

I support any bill that would make Labeling of GMO use.
My hope is you and others would do so as well.

Thank you,
Annelise McCay
Fairfield CT
Citizen, consumer & Tax payer.
