

Concerning Support for Bill 5117 AN ACT CONCERNING GENETICALLY-ENGINEERED FOODS.

Truth is being subverted. I want to know what I'm buying. I want to know what is being done to the food I might buy. I will not knowingly buy GE foods. We have manipulated our food production to the benefit of whom? The corporations that currently supply our food. To the detriment of the small farmers, the soil that we are destroying, the natural elements that feed our soil that we are exterminating. We are losing the biology of the soil and rendering it useless, mere dust in the landscape. And we are producing something that contains the very pesticides that we know can harm us. We will ingest the very poisons used to "control" the environment.

Let's do everything we can to keep us, at least, informed enough to know what we will be ingestng.
