

I am a supporter of Truth in Labeling (Bill HB 5117) whether it is GMOs or processing and in clear language.  
(I would take it one step further and say that GMOs should be banned).

My husband, Don R. Ledoux, D.C., and I own Turning Point Wellness Center in Suffield, CT.  
We teach people every day to stay away from gmo foods. We have a Truth in Food Labeling petition here at the clinic with 39 signatures so far and plan to go out to the community and continue collecting. Americans are interested in this topic; we haven't talked to anyone yet who hasn't supported truth in labeling (whether they have signed our petition or not). In fact, they are shocked to learn what companies get away with when it comes to food labeling.

Thank you for your time.
