Please read, and be prepared .

They mention my name which is fine.

All I can say is:

Phyllostachys is not planted in the ground in  
China, Tokyo , Australia.

Hawaii does not allow it to be shipped in.

Richard Mack: now doing study to see if imports  
should be stopped on Phyllostachys into the United States.  
( Mellissa doing our DNA on 8 samples now )

The scientific research has been done.  
This is an alien invasive non-indigenous to our  
continent that is causing great harm  
across all our states now. Sellers  
are going to make a big fuss. This we need  
to be ready for. It did not take me long  
to find this thread blog. Be ready \*\*\*\*
