

I am writing in regards to this bill that will hopefully outlaw the sale of this invasive bamboo. I hope there will be a way to protect people's properties from being invaded by this plant as it is so destructive. Property values will suffer as this invasive continues to destroy land near and far from where it has started. The sale of real estate will become impossible if this plant invades areas and neighborhoods across the state.

It is necessary to stop this invasive bamboo because of the many problems and destruction that occurs as it continues to keep spreading.

We have enough environmental problems. we do not need plants that are so destructive to everything in its path.

This bamboo worries me , not just because of our property damage but the possibility of it taking over our own native plants and destroying them completely.

I am hoping that my voice will be heard and counted in the proposal of bill no.5122.

Sincerely,
