

My husband and I are opposed to bow hunting on Sunday. The science shows killing deer will not reduce Lyme disease. The facts are clear and it's time we stop listening to people who have a self interest in spreading this propaganda. There are very few hunters in Connecticut and it's time to look at what the majority of the tax payers want. We want to go to parks and out on hiking trails with our family and pets on the weekend and not fear we will run into some hunter or see a deer with a large metal pole stuck in it's body. Bow hunting is a cruel and inhumane activity and the majority of Connecticut residents don't do it and don't want it in their communities. Please support the Opposition to SB83.
