

Good evening,

I wanted to register my opposition to arrow and bow hunting on Sundays, as would be authorized by this legislation.

It will not resolve deer related problems nor reduce lyme disease cases. It's also extremely inhumane – just horrific - and is a safety threat to humans and domestic animals as well. When only 1 percent of residents even hunt, I don't understand why this legislation is even necessary.

I know you've received lots of lengthy testimony supporting the reasons why we oppose SB 83, but I wanted you to hear from another CT resident who cares deeply about this issue.

Thank you for your time and consideration.
