

I am a property owner in Killingly, CT. I support the intent of Senate Bill No. 84 -- An Act Concerning Outdoor Wood Furnaces. I feel if the goal is to reduce the amount of pollution being emitted into Connecticut's air from the use of these highly controversial devices and to alleviate the symptoms neighbors have been experiencing especially in the warmer months. I don't feel the timeline of May 1 to September 13 is sufficient. Can the period of inoperation either be lengthened or maybe a tiered system put in place such as if the unit is zoned Residential or Agricultural / Residential then the period of inoperation be longer?
