

Testimony SB 93

My name is Maryellen Donnelly and I am the secretary of the Hampton Green Energy Committee.

I urge you to support SB 93 in order to facilitate the safe disposal of mercury thermostats and reduce contamination. Think of the cumulative effect of improper disposal of thermostats.

People want to do what is right for the environment. Convenient proper disposal and a bounty would facilitate putting what is right into practice. I support SB 93 and oppose SB 350.

Sincerely,
Maryellen Donnelly
