

I, Emily Glodek, support Bill 5117, which requires labeling of GENETICALLY-ENGINEERED FOODS, based primarily on the fact that not enough studies have been done to show that GENETICALLY-ENGINEERED FOODS are NOT detrimental to the health of human beings and other organisms that may be considered beneficial. I do not want to unknowingly consume something that could be damaging to my body. All people have a right to know what is in the food they purchase and consume.
