

I didn't post this but thought you should have it to show it is** not a few isolated cases as Bob Heffernan writes. (Conn Green letter)

Today I received a report of new invasions in Ridgefield. Also I have not logged five found a few weeks ago in Bethel. Also a few more in New Milford just planted no containment on property lines, reported by Kathleen Nelson a few weeks ago.

This spreadsheet will easily be at 200 invasions by the end of June 2012.

Please be sure the committee gets this important information. Also 8 DNA samples are being done now which I shipped to Washington edu, Pullman (Richard Mack and Melissa Smith)

<http://wsunews.wsu.edu/pages/publications.asp?Action=Detail&PublicationID=29300>

Melissa Smith will send these back to me soon.

I took eight random samples from each town.

Woodbury, Newtown, Southbury, and the invasion on the Merritt.

Also my property.
