

To Whom It May Concern:

I am one state residence that has been bothered by a neighbor's OWF during the summer months. Even though my residence is located approximately 1,500 feet from the OWF, the tree line, with its canopy of leaves, leading from the OWF to my house, captivates the smoke at ground level. When this happens, I cannot leave my doors and windows open, sit outside, or use my pool and garden even though I am retired. At times, my throat becomes so sore that I must leave the house to get relief. I also have a solar system, and I question how much electricity I am deprived of because of the presence of smoke particles in the atmosphere?

I am in favor of banning OWFs from the beginning of May to the end of September. I hope that my state representatives will support and pass Bill No. 84.

Respectfully submitted,

William Thiessen
