

Testimony before the Energy & Technology Committee

In Support of

SENATE BILL 450, AN ACT CONCERNING ENERGY CONSERVATION AND RENEWABLE ENERGY

Submitted by
Ruth Henderson

March 20, 2012

Senator Fonfara, Representative Nardello, and members of the Committee,

I am a senior person on Social Security. I support the Senate Bill 450. I need insulation in the attic and the boiler is rather old. This would decrease the amount of oil I use to heat my home.

I was fortunate to get some oil this winter from the fuel assistance program. This program has helped many citizens on fixed incomes. I think this program should be increased and not decreased.

More people are experiencing hardship and this winter was rather 'mild'. Lets don't forget this population that has paid their dues and now are in need of a little help.

Thanks for this opportunity to have a voice in saving SB 450.

Ruth Henderson
