

State of Connecticut  
Judiciary Committee

House Bill 5488

To whom it may concern:

The person or persons who ever came up with this idea is obviously not in their right minds. They obviously have not lost a loved one to homicide or understand the meaning of having life stricken grief, pain, anguish, sleepless nights, torment and never ending tears of pain. Prisoners who have murdered a human being do not deserve an ounce of credit or any comforts. If they had any good behavior, they would not be in the place they are. They should be there for life, for they took a human life without remorse or care of anything. Our son died because of an evil do'er walking this earth stabbed our beautiful 16 year old son in his back right down to his heart and also another seventeen year old boy the same night. The evil do'er was thirty years old. He only got forty years. He should have gotten life!!All murderers should be put on a deserted island far far out into the ocean with no means or chance of survival. The system is too good to them giving them activities , sports, etc. They should have nothing!!!! EVER!!!!!! Our son's life was taken away from us. He loved sports, music, and laughter. He especially loved his grandparents and his new baby brother. All taken away from him because of that evil Pig, Devil, Filth, Garbage, Joseph Pranckus III. Let him rot away the years in a dark hole. Knowing that he still exists sickens friends and family. If only you can feel our pain, then you would understand that they do not deserve anything NOW OR EVER!!!! Every second of the day is as painful as the last. To the person or persons who came up with this evil idea of earning credits for good behavior is truly not normal or caring for the families of homicide victims. Please, please, please, do not give them anything!!!!!!!!!! Stop such idiotic ideas. GOD's commandment "THOU SHALL NOT KILL" should be engraved in all their cells. AMEN

Regards,  
Mr. & Mrs. John Potkaj, families and friends of our Beloved Paul.
