Support collective bargaining for home care workers

I am an individual,. I have two jobs because I don't have enough hours with my consumer. Two hour shifts are not enough time. I need more time because my consumer, who is my brother, needs complete care.

We can fix our problems with a union by bargaining for sick time off with pay, vacation time off and because consumers need to be cared for properly. If we are sick, we should not have to go to work because we have no paid sick time.

Because PCAs need to be taken care of just like we care for our consumers.
