Waterbury

Supports bill # 5433

To Whom It May Concern: I think if there more help out there to provide help for more people and also benefits for those people who help take care of the ones who need it the most would be good because the job they provide they can get hurt and also I'm a person who need the help just about all day and night, so it will benefit me and my worker.

We need a voice.

I want this bill to pass because my family members do not get no medical or paid sick days or days off.
