For Bill #5433

The current system for PCAs isn't fair, and my consumer agrees with me. We have to work on holidays, without getting paid extra for it, we have no health insurance and so down time at all. My consumer thinks we should get more for the work we do.

Being able to bargain collectively means we'll be able to work out things like pay and benefits with the state. Right now there is no one to go to if we need higher wages or benefits or if our consumers need more hours of care.

We need legislators to pass the collective bargaining bill so we can be treated better as a workforce.
