Subject: Bill 5155

Kindly include my name as one of the citizens of Connecticut who are in favor on continuing the ban of pesticides on public grounds. Banning harmful chemicals protects our children who are especially sensitive to health risks posed by pesticides. I am a Connecticut Master Gardener and parent of two adult children. I reside in the town of Westbrook with property that includes a pond. Our stewardship of our property has included organic methods of care. I can attest that organic methods of insect "pest" management work.

Thank you,

EILEEN ZEHNDER
