Subject: toxic lawns

I have been researching the issue and do believe that many of the synthetic chemicals do MORE HARM than GOOD. I have had poison ivy rashed and while that is miserable for a while I would still prefer that to the toxic LONG term effects of the big business profit making as its only concern chemical exposure.

Be proactive like the first person to stand against tobacco companies when we all knew that stuff makes you sick.
Learn more at www.safelawns.org as one source. Other municipalites will be looking at the result of your case to make their own policies, so you have a chance to really make a big difference.
