Subject: No pesticides in K-8 Schools!

To Whom It Concerns,
Please do not undo the ban on pesticide application on school grounds. Pesticides are poisonous and dangerous to our children. My five year old will begin kindergarten next year and I want her in a safe environment, not a toxic one. Children will learn better and stay healthier when they are breathing clean air. Please do not pollute the K-8 public schools in CT. Keep the schools safe for children. If this bill (5155) passes it will be a major setback for the protection of young children from involuntary exposure to toxic lawn pesticides. Please protect our smallest children from pesticide exposures while they are in our schools.

Thank you for caring for the health of our young children.

Sincerely,
Megan O'Rourke
