Subject: Pesticide-free schools.

Dear Ms, Blancato,

As a concerned CT resident I want to express my outrage that pesticide companies in our state want to roll back the pesticide-free school legislation that was passed in 2005. It borders on criminality that these companies, who only care about one thing, (money), are willing to endanger our children. As you know, numerous studies have shown a colleration between pesticide exposure and cancer. I am thoroughly opposed to "An Act Modifying the Ban on Pesticide Applications on School Grounds," Bill 5155. As clerk of the Planning and Development Committee, I want you to know that I and thousands of other CT residents will fight this bill to the very end. Shame on those who, purely out of selfish motives, are supporting the reintroduction of these poisons.

Sincerely,

Henry Lord
