please convey my objection to 5155, and any other attempt to modify the current laws on pesticides, to the legislaive authorities considering the bill this week....for those of us who have children at risk and/or who have worked to develop other ways of managing pests and invasive plants and/or who have wells (many of them shallow) in areas near or adjacent to sites that would/could be treated by these products...a setback in attempts to pursue alternative remedies and reclaim land damaged by past chemical applications, 5155 would be harmful in and of itself and as a precedent that might lead to other attempts to insinuate industrial products that are proven or questionable public health risks.

thanks.

cc: rep. marilyn giuliano, sen. andrea stillman
