Petition to CT. State Senators/Representatives

We urge you to support the Hospice Facility Regulations 19a-122b-1 to 19a-122b-14 created by the Department of Public Health (DPH). These regulations are sorely needed and will provide opportunities for licensed hospice providers throughout the state to offer terminally-ill patients access to all levels of hospice services both in home and in facilities within their own communities. They will allow for small hospice residences (usually 12 or fewer beds) to be built in areas around the state where accessibility to all levels of hospice care is currently a problem (Greater Danbury, Southeastern CT and Fairfield County to name a few). These hospice residences will be close to home and convenient to friends and family with less worry about travelling distances/hours to visit.

We, the undersigned, are concerned citizens who urge our leaders to act now to support the passage of Hospice Facility Regulations 19a-122b-1 to 19a-122b-14 created by the Department of Public Health (DPH).

Petition to CT. State Senators/Representatives

We urge you to support the Hospice Facility Regulations 19a-122b-1 to 19a-122b-14 created by the Department of Public Health (DPH). These regulations are sorely needed and will provide opportunities for licensed hospice providers throughout the state to offer terminally-ill patients access to all levels of hospice services both in home and in facilities within their own communities. They will allow for small hospice residences (usually 12 or fewer beds) to be built in areas around the state where accessibility to all levels of hospice care is currently a problem (Greater Danbury, Southeastern CT and Fairfield County to name a few). These hospice residences will be close to home and convenient to friends and family with less worry about travelling distances/hours to visit.

We, the undersigned, are concerned citizens who urge our leaders to act now to support the passage of Hospice Facility Regulations 19a-122b-1 to 19a-122b-14 created by the Department of Public Health (DPH).
