Subject: Public Health Care

We live in the greatest nation in the world, yet we lack in health care for our citizens. Health care is vital to the well-being of this nation, especially to those with mental illness. Without proper health care our citizens will fall victims to many tragedies in life. Suicide, and homicide will increase, because the basic needs of those in need of sure care is not made available. Persons with mental illness need their medication for basic functioning, so that they can live a productive life as citizens in their great country. We send billions to the care of other countries. It is now time to take care of home. Our citizens especially those with mental illness need affordable health care insurance.
